Steganos Software releases Steganos Privacy Suite 14

Latest Version of Flagship Encryption Software Provides All-Around Privacy Protection for PCs and Smartphones

Berlin, Germany, October 23rd, 2012 – Steganos Software GmbH, a leading provider of user-friendly security and privacy software for individuals and small offices, today announced the availability of Steganos Privacy Suite 14.
Designed for individuals who want comprehensive privacy protection for their data and internet activities – including on their smartphones and USB sticks – the software's user-friendly interface and host of privacy tools featuring 256-bit AES encryption make it the ideal one-stop privacy solution.

The software has the following features:

• Steganos Password Manager keeps all of your account log-in information and PIN codes safe and sound, and helps you create secure passwords. Password Manager is also usable on iPhone, iPad and Android smartphones via a free app from the App Store or Google Play.

• Steganos Traceless Drives enable you to run any program on a temporary drive, which disappears when you shut off your PC. So no traces of your activity are left on your system.

• Steganos Safe enables you to create secure storage spaces of up to one terabyte in size for sensitive files. The safes can be hidden from view for extra protection.

• Steganos TraceDestructor lets you customize which traces you automatically want deleted from your Internet Explorer or Firefox browser.

• Steganos Email Encryption enables you to send password-protected emails that only your target recipient can open and read.

• Steganos Shredder allows you to completely eliminate all traces of data from your hard drive thanks to military-standard techniques.

• Steganos Portable Safe enables you to securely store and transport your confidential files on USB sticks, DVDs and Blu-Ray disks.

- Steganos Crypt & Hide lets you hide your encrypted sensitive data within picture or music files.
- Steganos Private Favorites provides privacy for your favorite bookmarked websites.

»Anti-virus software alone isn't enough to protect your data and online surfing activities«, said Gabriel Yoran, managing director of Steganos Software. »Only a comprehensive privacy package like Steganos Privacy Suite can keep hackers and spies at bay. We're confident that we have one of the best and easiest to use privacy packages on the market«, he added.

Product Pricing

Steganos Privacy Suite 14 can be purchased online for $69.95 at www.steganos.com. Updates from Steganos Privacy Suite 2012 (version 13), Steganos Privacy Suite 11 and Steganos Privacy Suite 12 cost $39.95 via electronic software download. A free 30-day trial version is available as well. Free mobile apps may be downloaded from the Apps Store or Google Play.

System Requirements

Steganos Privacy Suite 14 works on Microsoft Windows® 7 and 8 (32/64 Bit), Vista™ (32/64 Bit) and XP (Home Edition and Professional with SP3). The software requires 200 MB of free memory and a minimum Intel Pentium Processor or equivalent.

For Steganos Safe, extra hard disk space is required for the secure drives. The NTFS file system is required to use one terabyte per drive in full. Using the FAT32 file system, a maximum of four GB is possible per secure drive. Secure drives cannot be encrypted on compressed NTFS drives.

For Steganos Portable Safe, you may need CD, DVD or BD burners with corresponding software. You may also temporarily need up to 50 GB of hard drive space for the Portable Safe packet files. Administrator rights are required to install the encryption program and run Steganos Portable Safe on another computer.

Steganos Privacy Suite supports all key devices that recognize Windows as a writeable removable medium (e.g. USB sticks, memory cards, digital cameras). It does not provide mailbox encryption for 64-bit operating systems.

About Steganos Software GmbH
