

**PRESS RELEASE****VPN security for every device:*****my*Steganos Online Shield VPN now even offers  
Internet security for macOS devices**

**Berlin, 18. April 2018 – Berlin software provider Steganos ([www.steganos.com](http://www.steganos.com)) is launching *my*Steganos Online Shield VPN, a fully cross-platform VPN solution that now makes macOS devices secure on the Internet as well. The solution enables users to stay protected and surf the Internet anonymously on four operating systems, regardless of where they are. This keeps their passwords, emails, photos and chats are protected, not only on Windows PCs, but on Macs too, at home or in the office. At the same time, they can continue to surf securely with their tablet or smartphone in public WIFI hotspots without being observed, thanks to the re-engineered *my*Steganos Online Shield app for Android and iOS. Nothing is more unpleasant than worrying about other people spying on your private data behind your back when you are travelling, in a café or on the beach. Data thieves and hackers have no chance. What is private remains private, and business data remains secret.**

***my*Steganos Online Shield VPN at a glance:**

- Multi-platform – also for the first time available for macOS
- Protected VPN connection with no possibility of tracking
- Free from country blocks
- Modern VPN protocol (IKEv2 or OpenVPN)

- New account system simplifies management of up to 5 devices on any platform
- Free trial version for 7 days

### ***mySteganos Online Shield VPN – next-generation VPN***

*mySteganos Online Shield VPN* offers users a completely new generation of VPN solution “made in Germany”. They have their own private, anonymous connection to the Internet, encrypted with 256-bit AES, anywhere, at any time and on any operating system (Windows, macOS, Android and iOS). Newly integrated technologies, globally distributed high-performance servers and modern VPN protocols (OpenVPN and IKEv2) provide total security at high speed in any WIFI, LAN and wireless network. Virtual IP locations can be selected from an even bigger Steganos pool to circumvent country blocks and also reinforce privacy.

### **Five devices with one licence**

A newly integrated account system simplifies multiple device management on a licence for up to five devices. As ever, user behaviour remains anonymous and cannot be traced.

**System requirements**

iPhone, iPad or iPod touch from iOS10  
Smartphone or Tablet with Android 4.0  
("Ice Cream Sandwich") or higher  
macOS 10.11  
Microsoft® Windows® 10, 8 or 7: at  
least 1 GB of RAM (32 & 64 Bit)  
200 MB hard disk space, Internet  
connection

**Prices and availability**

*my*Steganos Online Shield VPN is  
available to download from the  
Steganos home page immediately. The  
VPN solution can be purchased from €  
7.95 and used on up to five devices. In  
addition, there is a free trial version  
that can be used without restriction for  
up to seven days.
